Color: Dark-Gun	Weight:15g
DC resistance: 42±10% Ohm	Sensitivity: 112±3 dB
Cable length:1.2m	Maximum input power:20mW
Microphone Sensitivity: -42±3dB	Transducers: Dynamics,10mm Neodymium
Frequency range:15Hz~22KHz	Microphone Frequency range:20Hz~16KHz

## High-res audio and high efficiency transmission

Single crystal copper silver plated cable for better signal transmission

Single crystal cooper silver plated cable can effectively reduce the loss of the signal transmission.Pair shielding wire structure can effectively eliminate the interference of other electromagnetic clutter.

## 120°angled metal plug for perfect fit

Alternate kindness with severity makes the cable strong and durable.

120°

Protect the connector between plug and cable from breaking and for Long life.

## Waterproof and sweat-proof design

The buttons of the microphone control adopts the design of combining soft and hard glue for the pleasant feeling on the buttons and prevent the sweat and water into them.And it's convenience for the phone calls with the microphone.

### Lightweight metal Y Piece not easy to fall off

It is made by Mechanical fastening instead of using the glue, which is much stronger and can be bearing 3kg.

### Lightweight metal housing and beautiful finish

High precision cutting process  
High density hand paint process  
Exquisite texture Fashionable, solemn and graceful appearance

## Analysis of E11C structure

① Silicone eartips

② Aluminum shell

③ 10mm speaker

④ Aluminum bottom center ring

⑤ Inner Earcup

⑥ Strain relief

⑦ Aluminum top center ring

⑧ Aluminum decorative part

## Response frequency curves of E11C

Triple frequency well balanced with high quality

## Distortion curve of E11C

## Sound quality UP

Made by 10mm speaker;High-frequency smoother and exquisite, low-frequency texture better, acoustic field have the greater ascension.

## Chinese song 《渡口》 from 蔡琴

You can hear the powerful and natural drumbeats on the song with E11C.Among the same price of the headphones,E11C is the one of the best.

## Chinese song 《死了都要爱》 from 信乐团

Even if the high pitch keeps going up, there's no breaking. It's very delicate and layered.

Detail and clear voices, high audio reproduction.The penetrating power of Wangfei's voice is more highlighted through E11C.

**Jazz:** can clearly feel the sound of the medium and high frequencies.

**Trumpet and piano:** the sound is particularly good

**Folk guitar electronics:** the sound of the guitar is super good, especially when more guitars are playing together, you can hear better resolution.
